The draft “[Landscape Assessment and Forest Management Framework for the Berkshire Ecoregions](#)” is available for public review and comment.

The assessment / framework is designed to inventory and assess the current state of the natural resources; identify the major issues related to management of the area's natural resources; and identify opportunities for and recommend courses of action for improving forest and other resource management in the Berkshire Ecoregions.

You are invited to attend a public meeting to review the key findings and recommendations of the assessment, answer questions, and hear from you.

Please participate by attending the meeting or commenting in writing.
